What is Clever?

Clever is a service that creates a single sign on for students into different platforms. For example, when a student logs onto a Chromebook they click on the ‘Clever’ app on the bottom of the screen and it will connect him/her to multiple site applications, with only one sign on. As Clever states on its site: “One username, one password, any app. Clever makes this dream possible and even makes logins fun for young students with Clever Badges.”

How does Clever work?

Chromebook login-

When a student logs on to their Chromebook (for Windows devices see next section below), they should get the ‘Clever’ app on the bottom of their screen, or taskbar. See below. If they don’t, please let me know.

Once they click on the icon, it will direct them to a ‘login’ page, see below. They will click on the ‘Log in with Google’ button. This will automatically take their current Chromebook login credentials and log them in w/out further username and password.
Upon clicking on that log in button, they will see something along these lines, depending on the apps that have been set up with their site. See below.

Your Apps

From this point on, the student can click on the desired application. For example, the student clicks on the ConnectEd app. Clever will open up a new tab and automatically log them in. No need to retype a username or password. It's that easy.

Windows login-

It’s recommended to use Google Chrome browser for this. Go to the following website:

STEP 1 Go to your portal: https://clever.com/in/vusd

STEP 2 Login with your Clever username and password:

**TEACHERS**
Username: Google email address  Password: Google password

**STUDENTS**
Username: Google email address  Password: Google password

Once you login, you will be at the main portal page where your apps will be listed.
**Login ‘Badges’ for K-3 grades**

K-3 students can use printable badges that will allow students to login to Clever* with a badge. These badges can be sent to the school in PDF format and you print them. Please notify Chuck Boone at Tech Services for the badges. See the video below that shows a quick demonstration of how it works:

*Note - the Chromebook will still require an account to be used to logged on, whether it’s each student's Google account, or the site generic account. If you are not sure if your site has a generic account, please email myself or your site technician.
